30	C41 (GG)	1	Number of approved engineer posts in the municipality	The number of approved engineering posts. An engineer is a person who designs, builds, or maintains engines, machines, or structures. An approved job post refers to employment posts that have been developed in relation to the Municipal Structures Act of 1998 and the Municipal Finance Management Act of 2003, and has been approved by the Municipal Manager.	New Compliance Indicator				
31	C42 (GG)	2	Number of registered engineers employed in approved posts	The number of registered engineers employed in approved posts. A Registered professional engineer is a person who is registered as a professional engineer with an official organising body. In South Africa, the statutory body for the engineering profession is the Engineering Council of South Africa (ECSA). An approved job post refers to employment posts that have been developed in relation to the Municipal Structures Act of 1998 and the Municipal Finance Management Act of 2003, and has been approved by the Municipal Manager.	New Compliance Indicator				
32	C43 (GG)	3	Number of engineers employed in approved posts	The number of engineers employed in approved posts. An engineer is a person who designs, builds, or maintains engines, machines, or structures with a formal qualification of a BScEng or BEng. An approved job post refers to employment posts that have been developed in relation to the Municipal Structures Act of 1998 and the Municipal Finance Management Act of 2003, and has been approved by the Municipal Manager.	New Compliance Indicator				
41	C56 (EE)	4	Number of customers provided with an alternative energy supply (e.g. LPG or paraffin or biogel according to supply level standards)	The number of customers provided with an alternative energy supply (e.g. LPG or paraffin or biogel according to supply level standards). Alternative energy supply refers to the use of any energy sources, other than traditional fossil fuels (e.g. coal, gasoline, and natural gas). In this instance, this would only include alternative energy supply that has been provided or issued directly by the municipality as per determined minimum standards. A customer refers to anyone registered to receive access to electricity and/or energy from the municipality.	0 (It is not the intention of the City to supply customers with alternative energy supply such as paraffin, LPG and biogel as these sources are not sufficient to supply all the customer requirements)				

SDBIP COMPLIANCE INDICATOR REFERENCE	MFMA C88 REF	INDICATOR NO	COMPLIANCE INDICATOR	INDICATOR DEFINITION	BASELINE (ANNUAL PERFORMANCE OF 2020/21 ESTIMATED)	1ST QUARTER ACTUAL PERFORMANCE (1 JULY 2022- 30 SEPTEMBER 2022)	2ND QUARTER ACTUAL PERFORMANCE (1 JULY 2022- 31 DECEMBER 2022)	3RD QUARTER ACTUAL PERFORMANCE (1 JULY 2022 - 31 MARCH 2023)	4TH QUARTER ACTUAL PERFORMANCE (1 JULY 2022 - 30 JUNE 2023)
42	C57 (EE)	5	Number of registered electricity consumers with a mini grid-based system in the municipal service area	The number of registered consumers with mini-based system in the municipal service area. A mini grid-based system is a set of electricity generators, and possibly energy storage systems, interconnected to a distribution network that supplies electricity to a localized group of customers. The indicator tracks the total number of registered consumers able to access electricity through alternative means, beyond municipal supply.	0 (There are no mini grid-based system within the municipal service area)				
43	C58 (EE)	6	Total non-technical electricity losses in MWh (estimate)	Total non-technical electricity losses in MWh. Electricity loss is a measure of unaccounted for energy. Non-technical electricity losses are caused by actions external to the power system and consist primarily of electricity theft, faulty or inaccurate meters, and errors in accounting and record-keeping. Therefore, by its very nature this indicator will rely on stated assumptions. Municipalities are to generate a measure of non-technical electricity losses in MWh on the basis of their existing procedures in terms of Standard Operating Procedures, while documenting the assumptions or parameters that inform such a measure.	685748.271 MWh				
44	C59 (EE)	7	Number of municipal buildings that consume renewable energy	The number of municipal buildings consuming own renewable electricity or embedded generation. Renewable electricity is understood as renewable own generation and/or embedded generation within municipal buildings themselves. Embedded generation refers to the small-scale production of power connected within the electricity distribution network, located close to the place of consumption. Renewable own generation is electricity generation technology which harnesses a naturally existing energy flux, such as wind, sun, heat, or tides, and converts that flux to electricity for specific own supply, not for sale to customers. Where embedded generation supplies a complex of free-standing structures, all individual structures can be counted as buildings. This is inclusive of buildings leased by the municipality, as well as municipality-owned buildings.	1 (100 Kw South End Fire Station)

SECTION C: COMPETENCY REQUIREMENTS

SECTION C1 - COMPETENCY FRAMEWORK

In the below Competency Framework, "core competencies" are competencies that cut across all levels of work in a municipality and enhance contextualised leadership that guarantees service delivery impact; and "leading competencies" means competencies that are required to develop clear institutional strategy, initiate, drive and implement programs to achieve long-term sustainable and measurable service delivery performance results.

This competency framework replaces regulation 26(8) of the Local Government: Municipal Performance Regulations for Municipal Managers and Managers directly accountable to Municipal Managers, 2006.

A person appointed as a senior manager must have the competencies as set out in this framework.

The competency framework consists of six leading competencies which comprise of twenty (20) driving competencies that communicate what is expected for effective performance in local government.

The competency framework further involves six (6) core competencies that act as drivers to ensure that the leading competencies are executed at an optimal level.

There is no hierarchical connotation to the structure and all competencies are essential to the role of a senior manager to influence high performance. All competencies must therefore be considered as measurable and critical in assessing the level of a senior manager's performance.

The competency framework is underscored by four (4) achievement levels that act as benchmark and minimum requirements for other human capital interventions, which are, recruitment and selection, learning and development, succession planning, and promotion.

The competencies that appear in the competency framework are detailed as follows:-

SECTION D

(a) Performance Calculations and Ratings

At the end of each performance review cycle, the employee will be assessed in terms of the required targets reflected on his / her respective performance plan. The following elements are essential in determining performance levels:

(b) Performance Weighting

Weightings allow emphasis to be placed on KPAs and key objectives that carry more importance and/or take more time. Every KPA in the performance agreement or plan must be assigned a weighting. The total of the weightings on each of the two components of the performance plan must add up to 100.

The purpose of the weighting is to enable Council to ensure performance of the key objectives with the highest strategic importance, and to reward outstanding performance accordingly.

(c) Performance Rating

The rating can be defined as the level of achievement of the targets set for a specific key performance area. The Nelson Mandela Bay Municipality uses the five-point system for rating performance, as contained in the performance agreement (see Clause 7.6).

(d) Score

The score represents the product of the average rates of all the targets for each key performance indicator, and the weight for the respective key performance area; e.g. if the average rate is 3 and the weighting is 15, then the weighted score = 3×15 , which equals 45.

(e) Total Weighted Score and Performance Percentage

The total score is the sum of the weighted scores for all the key performance areas and competency requirements for a specific position. Therefore by adding all the weighted scores, one arrives at a figure representing the total weighted score.
